

Defect Description:

User is allowed to save phone number with more than 10 digits

Steps to reproduce:

1. Go to <https://lingapp.com/welcome>
2. Click 'Edit Contact' link
3. Click 'Add Contact Information' button
4. Click 'Phone Number' option
5. Select 'Phone Type, then enter phone number with 20 digits and Click 'Save' button

Expected result:

User should be shown error saying that the phone number isn't valid

Actual result:

Phone is updated even though it's invalid

The screenshot shows the 'Edit Contact' interface of the Ling app. On the left is a sidebar with the 'Ling' logo and navigation options: Pages, Contacts, Phone, Analytics, Products, and Menu. The main content area is titled 'Edit Contact' and contains several input fields: 'Enter your job title', 'Organization / Company' (with sub-field 'Enter your company name'), and 'Location' (with sub-field 'Enter your location (Ex: New York, NY)'). Below these is a green 'Edit / Delete' link. The 'Mobile' section is expanded, showing a text input field containing 20 digits: '65555555555555555555555555555555'. This field is highlighted with a red rectangular border. At the bottom of the form is a blue button labeled '+ Add Contact Information'. A vertical scrollbar is visible on the right side of the form area.
